j) INCOME TAX:

Tax expenses comprises of current and deferred tax. Current income tax is measured at the amounts expected to be paid to the tax authorities in accordance with the Indian Income Tax Act.

Deferred income taxes reflects the impact of current year timing differences between taxable income and accounting income arising in the current year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be adjusted against future profits.

k) IMPAIRMENT OF ASSETS

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal / external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.

After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful life.
